PATENT SEARCH ANALYST

ORGANIC CHEMISTRY

Job Description:

Patent Engineers specialize in conducting patent searches for clients. They utilize their technical background and experiences to understand and visualize each invention or patent disclosure; and apply critical thinking, mechanical reasoning and problem-solving skills to conduct a focused and comprehensive search for prior art references for a search report. Patent Engineers appreciate how things work.

At Cardinal, our Patent Engineers work with constantly new inventions and cutting-edge technologies, each project providing unique and broad challenges. Patent Engineers work on various types of projects, including but not limited to examination, patentability, invalidity, state of the art, and freedom to operate searches.

Position Responsibilities/Duties:

- Conduct high-quality patent search projects
- Meet deadlines and manage the assignments on docket
- Communicate effectively with other staff and team members
- Work and be available during business hours

Required Skills and Abilities:

Performance requirements:

- Technical understanding of the invention disclosure, and identification of search focus
- Problem solving skills in constructing and conducting patent searches using various search engines
- Critical thinking skills to analyze found results and completing a search report

Other Skills:

- Self-motivated to work effectively and efficiently
- Attention to detail and ability to meet deadlines

Qualifications:

- Ph.D. in Organic Chemistry
- OPT applicants are welcomed
